What's New in Version 3.2?

FUNCTIONALITY

- Data entry fields can now be disabled in user and item collection pages.
- Set reservation restrictions per item, such as max. reservation time, min. reservation time, number of reservations.
- Define whether a data entry field comes as text field or dropdown box in the item collection pages.
- Events can be disabled per user group, just as items.
- Users can set any mail remainder in their profiles.
- Program now allows to disable program login for non-administrators.
- Program skins! Change the program look in just a second!
- ColorMatcher and ColorPicker added for easy selection of colors.
- Reservation pages and calendar now come with improved popup-windows.

PERFORMANCE IMPROVEMENTS

- Version 3.1 database can be migrated to version 3.2.
- Improved character entry check in forms.
- Colorize any dropdown box entry.
- Added option to search for user group in user pages.
- You can now set the default login and password in default.asp
- Program quick start hints in program home are now available.
- Solved problems caused by client programs such as ZoneAlarm, Norton Internet Security, etc.
- Simplified license procedure: Program is now free for up to 15 users and reservations.
